This is a first action in response to an Election/Restriction mailed on November 26, 2004. The applicant has elected Species II, consisting of claim 6, without traverse. Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 6 is rejected under 35 U.S.C. 102(b) as being anticipated by Woo et al (US Patent no. 5,781,788).

Regarding claim 6, Woo discloses an encoding/decoding control method in a video codec system, which is implemented in a processor independent from a host system (See Woo fig. 1, col. 3, lines 36-43), the encoding/decoding control method comprising the steps of resetting pre-assigned bits of a task status register in the video codec system so that an encoder and/or decoder can operate when a start command is input from the host system (See Woo fig. 5, col. 13, lines 46-56), determining whether or not to perform encoding and/or decoding, by checking a reset of the task status register in

the encoder and/or decoder (See Woo col. 13, line 58, lines 66-67, col. 14, lines 1-5), making pre-assigned bits of the task status register indicate buffer statuses of an encoder buffer and a decoder buffer (See Woo fig. 5, items 220, and 222, col. 13, lines 50-66), and checking the buffer statuses of the encoder buffer and the decoder buffer written in the task status register (See Woo fig. 5, items 220, and 222, col. 13, lines 50-66), and then controlling tasks of the encoder and the decoder (See col. 13, line 67, col. 14, lines 1-9, and lines 29-36).

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Murakami et al. (US Patent no. 5010401) teaches picture coding and decoding apparatus using vector quantization.
